The growth of a tree is the same as life. When it stops growing, it starts to decay. Similarly, corporations must continuously grow in order to survive in the era of global competition.

Innovation and challenge is Miretech's DNA.

We must face numerous trials and errors in order to grow, but this is also the foundation for spreading new branches.

Miretech will be a corporation that continues to grow through its creative corporate culture.

We are committed to the key principle of value creation for our customers through change and growth.

MIRETECH

If anyone can do it, then we would not even start.

We would like to open a new era of formwork in Korea with the manufacturing and research technologies accumulated in the Form Tie System. Challenging what no one else can do is Miretech's spirit.

MIRETECH creates technology that does not exist in the world

MIRETECH, ENGINE OF GROWTH

People ask what is Miretech's engine of growth. Most people assume the Miretech's innovative technology is the engine of growth. Miretech's constantly strives for and researches new innovative technology. But, that is not the key to growth. The reason Miretech exists today is because it is a 'trusted' name. Since Miretech's inception in 1999, we have spent that time in building that name. In order to convey what we do are human skills, we strive to constantly meet, communicate, and empathize. The 'trusted' name that we earned is the core competency of today's Miretech.

FROM INNOVATION TO CREATION

Miretech's way forward is to go beyond innovating what already exists and to create what does not exist. Korea is built utilizing Miretech's technology. Now, Miretech's technology is going global. We will achieve the future that we dreamt.
